

## Aula 11

Verificar cada mintermo com 1 ➡

se for coberto só por 1 implicante primo, então este é implicante primo essencial

1. Obter implicantes primos
2. Obter implicantes primos essenciais
3. Expressão = soma lógica dos implicantes primos essenciais

outros implicantes primos necessários para cobrir outros mintermos

### 3 implicantes primos

**$\bar{A}D \longrightarrow$  essencial**

**B $\bar{D}$   $\rightarrow$  essencial**

- ▶ Não é essencial - todos seus minterms são cobertos por mais de 1 implicante primo

$$F = \overline{A}D + B\overline{D}$$

$$F = \sum m(0,5,10,11,12,13,15)$$

p1	$\overline{A}\overline{B}\overline{C}\overline{D}$	→	essencial	m0
p2	$\overline{B}\overline{C}\overline{D}$	→	essencial	m5
p3	$\overline{A}\overline{B}\overline{C}$	→	essencial	m12
p4	$\overline{A}BD$	→	escolher entre 1 destes	
p5	$\overline{A}CD$			
p6	$\overline{A}\overline{B}C$	→	essencial	m10

	m0	m5	m10	m11	m12	m13	m15
p1	X						
p2		X				X	
p3					X	X	
p4						X	X
p5			X				X
p6		X	X				

falta cobrir só m15 - pode-se escolher p4 ou p5

$$F = \bar{A}\bar{B}\bar{C}D + \bar{B}\bar{C}D + A\bar{B}\bar{C} + A\bar{B}C +$$
